STUDY TIMELINE

Guideline Updates

- The guideline and decision support tool for late preterm antenatal corticosteroids have been drafted.
- The decision support tool summarizes short-term neonatal benefits and harms of late preterm antenatal corticosteroids, and available evidence on long-term outcomes.
- The guideline will be submitted to the Society of Obstetricians and Gynaecologists of Canada in mid-July, aiming for full approval by December 2022.
- We are currently piloting the decision support tool among OBGYNs across Canada.
- We will implement edits to the decision support tool based on piloting results and ongoing feedback from our colleagues.

Featured Profile

Meet Deveshi
Deveshi, Clinical
Research
Assistant at
Surrey Memorial
Hospital

Deveshi is a Clinical Research Assistant with the Clinical Research Unit at the Surrey Memorial Hospital. Her passion to understand health, disease and wellness initiated her interest in medicine and research. She completed her Bachelors of Science in Health Sciences with concentration in Life Sciences from Simon Fraser University in 2021. Her prior research experience includes studying biological pathways and epigenetic regulation in the progression of neurodegenerative diseases such as Muscular Dystrophy and Alzheimer's Disease. Her research interests include epigenetics, health ethics, epidemiology and health promotion.

Deveshi is very excited to be part of the Grey Zone Study Team and contribute to such patient-centred and evidence-based research initiative. In her spare time, Deveshi volunteers at a residential care home as a Recreation Therapy Volunteer by organizing various wellness activities for residents. She also enjoys playing badminton, reading mystery novels and gardening in her free time.
